99% Organically Certified
Dr. Lansky's Famous Original *Evidence-Based*
Pomegranate Emulsion
SUPPLEMENT FOR RESEARCH
(not intended for human consumption)

This is the original Pomegranate Emulsion, cognized, created, developed, engineered, and produced exclusively by Dr. Ephraim Philip Shmaya Lansky, M.D., Ph.D., M.B.A., B.A. in his advanced, sterile, private laboratory in Haifa, Israel. The emulsion consists almost completely (99%) of products derived from Israeli-grown, organically certified, special highly active strains of the fruits, leaves, and flowers of the pomegranate tree, *Punica granatum*. This unique product, the only such in the world, contains both pomegranate fermented aqueous and unfermented lipid fractions smoothly blended together with the addition of 1% natural emulsifying agents derived entirely from vegetable sources. It meets all qualifications not only for Vegan-friendly certification, but also according to the strictest standards of Kosher and Halal Food Products.

Dr. Lansky is a graduate of the first medical school in the United States, the Perelman University of Pennsylvania School of Medicine (1982), and also holds a Ph.D. in pharmacognosy from Leiden University in the Netherlands (2008), one of the world's oldest universities, founded in 1575, and a favorite of Albert Einstein and Baruch Spinoza. Dr. Lansky was the first graduate of Leiden in the University's history to receive and defend his doctoral dissertation, *Anticancer Pharmacognosy of Punica granatum*, entirely by video conferencing. At the present time, he is believed to be the sole physician in the Western world holding a Ph.D. in Pharmacognosy, the pharmacology of crude, i.e., natural, drugs.

His famous Pomegranate Emulsion is the result of over 10 years of vigorous research, funded in part by the Office of the Chief Scientist of Israel and costing more than 1 million US dollars. In recent years it has been the subject of six published *in vivo* studies and found to be effective in preventing liver cancer (3 published studies) and breast cancer (3 published studies). It has also been found effective *in vivo* for preventing symptoms of schizophrenia and damage to brain hippocampal mitochondria induced by the drug ketamine, now being used clinically as a rapid, long-term treatment for major depressive illness. Presently, it is also being studied as a powerful means of reversing unwanted upregulation of Epithelial Growth Factor Receptor (EGFR) caused by delta-9 tetrahydrocannabinol (THC) when the latter is used as an experimental treatment against leukemia, prostate and lung cancer, lymphoma, etc.

This naturally creamy, liquid product is available for **research purposes only**. **It is not intended for human consumption!** Suggested daily dose for chemoprevention research is 0.25 ml (250 mg) per kg, with doses of up to ten times that or even higher for research therapy of active disease. The composition of the product was approved safe at these doses as a nutritional supplement by the Israel Ministry of Health in 2008.

How to Order the Original Pomegranate Emulsion for Research

Dr. Lansky's Original Pomegranate Emulsion is available for research purposes only at a cost of \$200 (US dollars) per 334 ml blue glass bottle, international postage included. A full liter (3 bottles) is available, international postage included, for \$500.

Payment may be made by any one of the following methods:

1. Direct bank transfer (write for bank details)
2. Western Union to "Philip Steven Lansky, Israel" (email to us the WU MTCN number)
3. Check payable to "Philip Steven Lansky" mailed to POB 9945, Haifa, Israel (item will be shipped after check clears)
4. PayPal to rimonext@gmail.com

With all methods, please alert us to punisyn@gmail.com if a payment has been made.

Bottles are expertly packed and shipped securely, generally within 24 hours of payment.

Email: punisyn@gmail.com Telephone: +972 77 300 1612
